PROFESSIONAL EXPERIENCE

Data Analyst — AI SaaS marketplace platform - Stackly — Chennai | *Mar 2026 – Present*

- Built a star-schema Power BI model with 21 DAX measures across 4 display folders, enabling dynamic filtering by category, pricing tier, and feature set for 40+ competitor benchmarks.
- Consolidated competitor pricing, features, and market gaps into an Excel Master Matrix + Summary workbook, adopted as the single source of truth by product and pricing teams.
- Delivered a 4-page interactive Power BI dashboard (Market Overview, Category Deep-Dive, SWOT Quadrant, Pricing & Roadmap) and an 11-slide executive deck, translating findings into strategic recommendations.
- Partnered with product and marketing stakeholders to define KPIs and benchmark 10+ AI product categories, supporting market positioning and pricing strategy decisions.

Executive – Surveillance Data Reporting — Exhilar Innovative Solutions — Chennai | *Dec 2022 – Dec 2025*

- Analyzed performance data of 7,000+ surveillance cameras using SQL and Excel, monitoring SLA compliance and uptime metrics across regions.
- Designed and deployed 5+ interactive Power BI dashboards tracking daily, weekly, and monthly KPIs for operations leadership.
- Automated data extraction, cleaning, and validation workflows in SQL and Python, ensuring reliable inputs for recurring Power BI reporting.
- Identified underperforming regions through trend analysis, contributing to a **15% SLA compliance improvement** (≈70% → 85%).

KEY PROJECTS

Automated Job Market Intelligence Pipeline — Python, Pandas, APIs, Matplotlib, Seaborn, Regex (Personal/Portfolio Project)

- Engineered an **end-to-end ETL pipeline** in **Python** to fetch, clean, and analyze live Data Analyst job postings from the Adzuna REST **API**. Secured API credentials using environment variables (.env), demonstrating industry-standard data security practices.
- Built a **custom Regex text-parser** and automated reporting system using **Pandas, Matplotlib,** and **Seaborn**. Extracted in-demand technical skills from unstructured text and generated dynamic visualizations (Top Skills, Location Demand, Co-occurrence Heatmap) to **deliver actionable market insights**.

Paper Leak Incidents Analysis — India (2004–2026) (Personal/Portfolio Project — Power BI)

- Built an **end-to-end Power BI dashboard** analyzing **110 exam paper leak incidents** across 25 Indian states (2004–2026), uncovering geographic hotspots and multi-decade trend patterns.
- Used Python to **profile and validate** the dataset (duplicates, missing values, inconsistent keys), running state-wise and year-wise aggregations that fed the BI layer — demonstrating **source-to-destination data quality tracing**.
